

**HORIZON JACKET**  
3048 / 3148

**BREATHABLE**

**WATERPROOF & WINDPROOF OUTER**

Stencil Lite-Tex products are made with lightweight & breathable 3-layer bonded fabric with a microfibre fleece lining. Lite-Tex has a smooth outer layer that is both windproof and waterproof. The smooth outer face has a durable water repellent finish and a waterproof rating of 10,000mm which forces water and liquids to be rolled off the fabric's surface, keeping you dry and shielded during rainy or windy climates.

**BREATHABILITY & WARM INNER**

Lite-Tex fabrics ensures maximum breathability with a Moisture Vapour Perspiration (MVP) rating of 8,000 g/m<sup>2</sup>. A laminated membrane is built within the 3-layer bonded fabric to release body heat that is kept inside the jacket, preventing the body from overheating and feeling stuffy. The fabric inner layer is made of a soft microfibre fleece that is kind to the skin, maintaining warmth and extreme protection from the cold.
