COFFEE CHARCOAL

KAHVE POLO
1064 / 1164

COFFEE CHARCOAL INNER 30%

Our Kahve Coffee Charcoal polo consists of a yarn made from coffee grounds fused with polymers. This unique Eco-Friendly yarn offers:

- Excellent natural anti-odour qualities for the life of the garment
- Soft feel against the skin
- Quick drying time
- 50+ UV ray protection

Stencil's HY-TECH® development of this new Eco-Friendly fibre is innovative and better for the industry taking into consideration both social and environmental impacts.

CATIONIC POLYESTER OUTER 70%

The fabric outer is a modified polyester Cationic dyeable yarn which is a highly durable and breathable fabric. The Cationic dyeing process:

- Gives the polyester a stronger anti-pilling performance
- Higher fade resistance
- Better natural elasticity less emissions than traditional dyeing methods
- Uses less water and lower temperatures which then produce far fewer emissions

The cationic dye also shields the carbonated coffee built within our Coffee Charcoal fabric from sunlight, thus reducing heat storage and enhancing breathability for maximum comfort.
